PRESENTATION ON THE DECLINE OF HARAPPAN CIVILISATION by GROUP 1

This presentation, conducted under Dr. Anindita Bandyopadhyay, helped us understand and learn the causes responsible for the decline of the Harappan civilisation. This presentation helped us understand the different theories and factors that scholars still debate about regarding the end of this civilisation. At first, we learnt about the Aryan invasion theory, then we talked about the environmental factors. This was followed by the last factor discussed on the topic, which was the economic downfall. In conclusion, we understood a vast topic in an easier way through this presentation. It also promoted active participation and increased our confidence in our research, speaking, and visual design skills.
